PRELIMINARY AMENDMENT PCT/KR2005/001974

REMARKS

In the Title of the Invention

Applicant has amended the Title by adding a single word 'Functional' to the invention title so as to read "Functional Water Purifier".

In the Description

Applicant has found that some of the length units "mm" are garbled to small rectangular symbols " \square " in the PCT Publication, presumably due to *font compatibility problems at the stage of International Filing*.

In the Claims

Same as in the Description, the applicant has also found that some of the length units "mm" are garbled to small rectangular symbols "\(\sigma\)" in the PCT Publication, presumably due to the same font compatibility issue.

Substitute Specification reflecting this amendment is attached together with this PCT U.S. National Stage Entry. No new matter in this amendment and in the substitute specification. Drawing and abstract remain unchanged.

Applicant now respectively requests a timely examination of the PCT national stage application in consideration of this preliminary amendment.

Respectively submitted,

IPLA P.A.
